**2023 HOUSING STUDY.** The study was conducted by Dr. Alan Barefield at Mississippi State University. According to Dr. Barefield, “. . . Tishomingo County has had a remarkable level of economic growth over the past several years. Lightcast (formerly EMSI) estimates that the total number of jobs in Tishomingo County increased by 26.6% from 2010 to 2022 and that the number of manufacturing jobs in the county – the county’s largest employment sector – increased by 76.9% over the same time frame. In comparison, estimates for the State of Mississippi indicate a 10.1% increase in the number of total jobs and a 10.2% increase in the number of manufacturing jobs during the same time period while the United States is estimated to have experienced a 20.0% increase in total jobs and an 11.6% increase in manufacturing jobs.

Looking forward, Tishomingo County is expected to see a 19.5% increase in total jobs and a 25.9% increase in manufacturing jobs from 2022 to 2033. Mississippi is expected to experience a 11.5% increase in total jobs and a 10.1% increase in manufacturing jobs while the U.S. is expected to have a 13.3% increase in total jobs and a 6.5% increase in manufacturing jobs for the same time period.

These data and estimates suggest that there may be a viable market for quality rental housing in Tishomingo County. . .”
